

**John I. Gallin, M.D.**, is the NIH Associate Director for Clinical Research and Chief Scientific Officer Clinical Center, having recently completed 22 years as Director of the Clinical Center. The Clinical Center serves the clinical research needs of 17 NIH Institutes and is the largest clinical research hospital in the world. During his tenure as Director Clinical Center, Dr. Gallin oversaw the design and construction of a new research hospital for the Clinical Center, established a curriculum for clinical research training and oversaw the development of a new information system for clinical research. Previously Dr. Gallin was Scientific Director, National Institute of Allergy and Infectious Diseases (NIAID) from 1985-1994. He also was the founding Chief of the Laboratory of Host Defenses, NIAID and currently is the Head of the Clinical Pathophysiology Section. His primary research interest is rare hereditary immune disorders of phagocytes with particular emphasis on chronic granulomatous disease (CGD). His laboratory described the genetic basis for several forms of CGD and has done pioneering research that has reduced life-threatening bacterial and fungal infections in CGD patients. Dr. Gallin has published more than 350 articles in scientific journals and has edited several textbooks including *Principles and Practice of Clinical Research* (Academic Press, 4th edition now in preparation). He is a member of the American Society for Clinical Investigation, the Association of American Physicians, the National Academy of Medicine, and is a Master of the American College of Physicians.
